

## INTRODUCTION

---

Worry has been expressed over the reliance on foreign journals which are products of research carried out in and around those societies, when there are so many local journals in and about the country. One of the reasons for this discrepancy is the invisibility of local journals published in Nigeria.

Researchers in most cases are only aware of the journals published within their environment or online. Nigeria is a big country with many academic institutions and research institutes that make frequent journal publications. This work “A GUIDE TO NIGERIAN JOURNALS & INSTITUTIONAL REPOSITORIES” is an attempt to promote the use of local journals in Nigeria. The publication has collected all the journal titles with their table of contents published locally within 2017/2018 in the field of Agriculture, Engineering, Arts, Science & technology, biology and life sciences, information science etc.

The publication will bring to the notice of a researcher all journals with their table of contents published within a particular year and determine whether to find it for their research purposes.

Moreover, the work was garnished with a guide to institutional repositories in Nigeria.

This publication is intended to be a biannual.
